Employee Onboarding Application-Phase 7
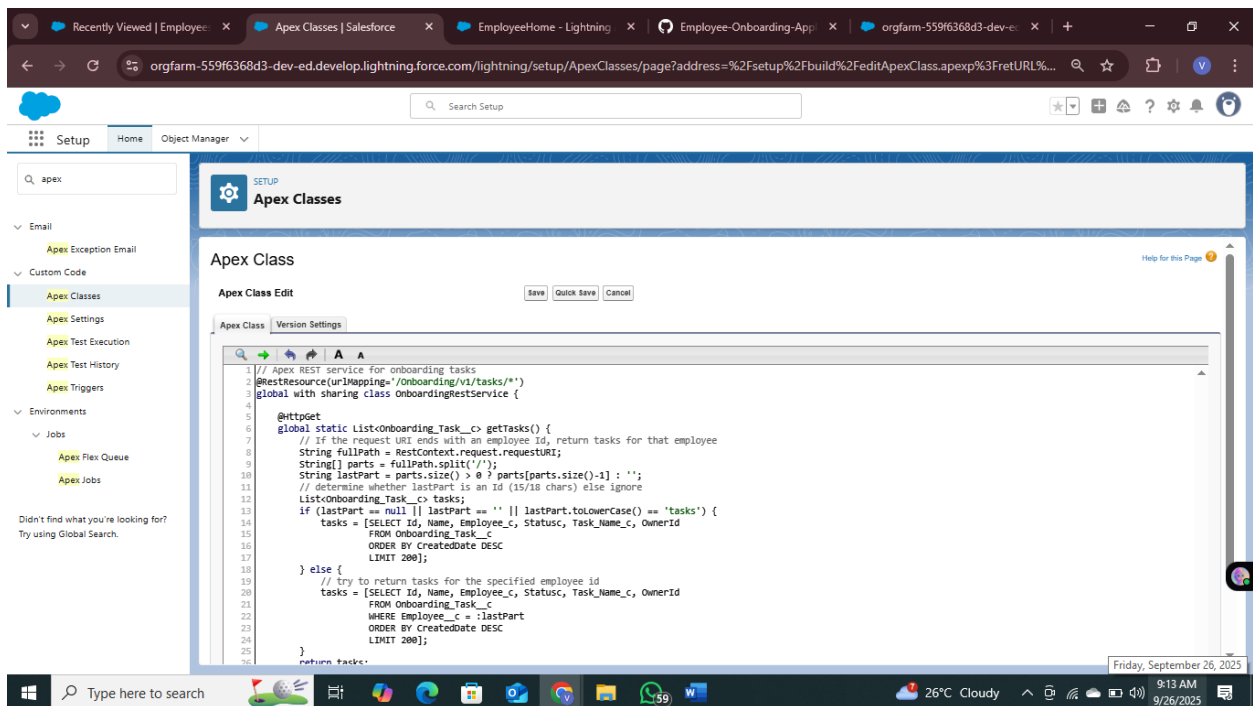

Phase 7:Integration & External access:

◆ Objective:

Enable integration and external access so that the onboarding process can interact with external systems (such as HR, payroll, or email services) and provide visibility to users outside Salesforce if required.

1. Expose REST API

Created an Apex REST service that exposes employee onboarding data externally.

◆ Outcome:

Employee onboarding tasks and employee details can now be securely accessed or shared with external system
